Preface

In March 2011, a massive earthquake and the resulting tsunami struck the Tohoku area in Japan, causing serious damages to TEPCO’s Fukushima Daiichi nuclear plant and the release of a significant quantity of radionuclides into the surrounding environment. This accident underlined the necessity of establishing new and comprehensive scientific research for promoting safety in nuclear technology. With this aim, the Kyoto University Research Reactor Institute (KURRI) developed a new research program called the “KUR Research Program for Scientific Basis of Nuclear Safety” from this year. In this program, we are planning to hold an annual series of international symposiums along with many other research activities.

The first in this series of symposiums, entitled “The International Symposium on Environmental Monitoring and Dose Estimation of Residents after Accident of TEPCO's Fukushima Daiichi Nuclear Power Station,” deals with the radiological effect of the March 2011 accident in Fukushima Daiichi NPP on the public. The purpose of this symposium is to collate data on environmental radioactivity and radiation dose in residents, discuss and verify these data, and clarify the actual situation of environmental contamination and resultant radiation exposed to the residents. We believe that an accurate estimation of the radiation dose is quite essential for planning for the healthy life and mental contentment of the residents, and we hope that many researchers who are studying the radiological effects of the accident will join us for these purposes. The environmental monitoring data are important for the dose assessment for residents. However, the monitoring data in the early stage are not sufficient for dose assessment, particularly near the NPP site, because of the confusion and blackout caused by the earthquake. However, many researchers and organizations in Japan and other countries have independently carried out radiation monitoring. We believe that the publication and reviewing of these data is not only essential but our duty toward future generations.

Approximately 10 invited lectures and 50 scientific papers will be presented in the symposium. Almost all the presentations have been written as original scientific papers, peer reviewed by specialists of the relevant research fields, and included in the proceedings booklet. On behalf of all the participants of the symposium, I sincerely hope that this symposium and its proceedings will contribute to the faster recovery of people who have encountered damages from the accident and will promote further progress in the research on nuclear safety.

Hirotake Moriyama
Director, Kyoto University Research Reactor Institute
Chair of the organizing committee
## Contents

### Part 1  Radiation survey in environment

1. **Environmental radiation status in Bunkyo-ku, Tokyo, after the TEPCO Fukushima Dai-ichi nuclear power plant disaster**  
   Takao EBISAWA, Seiichi HIROSE, Etsuko FURUTA, Keiji KUSAMA, Takeshi IIMOTO

2. **Environmental radiation status in Kashiwa city (Chiba prefecture) after the TEPCO Fukushima Dai-ichi nuclear power plant disaster**  
   Seiichi SOMEYA, Hirofumi FUJII, Takeshi IIMOTO

3. **Environmental radiation status in Nagareyama city (Chiba prefecture) after the TEPCO Fukushima Dai-ichi nuclear power plant disaster**  
   Sadao IIIZUMII, Hirofumi FUJII, Takeshi IIMOTO

4. **Environmental radiation status of the University of Tokyo after the TEPCO Fukushima Dai-ichi nuclear power plant disaster**  
   Takeshi IIMOTO, Norio NOGAWA, Hiroshi MITANI, Masao KAMIKO, Natsumaro KUTSUNA, Yasuhiro WATANABE, Takahiko SUZUKI

5. **Radiation measurement in East Japan using a GM-tube detector after the Fukushima nuclear accident**  
   Takumi KUBOTA, Tomoko OHTA, Yasunori MAHARA

6. **Measurement of radiation dose inside a car across Fukushima from March 19 to 22, 2011**  
   Takumi KUBOTA, Jun-ichi HORI, Nobuhiro SATO, Koichi TAKAMIYA

7. **Diffusion and export dynamics of $^{137}$Cs deposited on the forested area in Fukushima after the nuclear power plant accident in March 2011: Preliminary results**  
   Nobuhito OHTE, Masashi MURAKAMI, Takahiro SUZUKI, Kohei ISEDA, Keitaro TANOI, Nobuyoshi ISHII

8. **Distribution of gamma-ray dose rate in Fukushima prefecture a car-borne survey method**  
   Shinji SUGIHARA, Noriyuki MOMOSHIMA, Akihiro MAEKAWA, Ryohei ICHIKAWA, Hidehisa KAWAMURA

9. **Dose rate survey inside and outside three public buildings located approximately 40km northwest of the Fukushima Daiichi Nuclear Power Stations**  
   Kazuaki YAJIMA, Kazuki IWAOKA, So KAMADA, Masashi TAKADA, Hiroyuki TABE, Hidenori YONEHARA, Sin-ya HOHARA, Genichiro WAKABAYASHI, Hirokuni YAMANISHI, Tetsuo ITOH, Michio FURUKAWA

10. **Measurement of the environmental radiation dose due to the accident at the Fukushima Daiichi Nuclear Power Plant**  
    Tomoaki YAMAMOTO, Kenzo MUROI, Sumito MARUYAMA, Takahisa KOIKE, Marina MATSUDA, Kenichiro KATSUMATA

11. **Environmental radiation survey in Kawamata-machi, Fukushima-ken : Measurement of radiocesium in soil and plants**  
    Hirokuni YAMANISHI, Masayo INAGAKI, Genichiro WAKABAYASHI, Shin-ya HOHARA, Tetsuo ITOH, Michio FURUKAWA

12. **Environmental radiation measurements immediately after the accident and dose evaluations based on soil deposition**  
    Masahiro YOSHIDA, Tominori SUZUKI
Part 2  Environmental radioactivity

1  Observation of radionuclides in marine biota off the coast of Fukushima prefecture after TEPCO's Fukushima Daiichi Nuclear Power Plant accident
   Tatsuo AONO, Yukari ITO, Tadahiro SAOTOME, Takuji MIZUNO, Satoshi IGARASHI, Jyota Kanda, Takashi ISHIMARU

2  Dose rate estimation for northern Miyagi prefecture area in the early stage of the Fukushima Accident
   Satoru ENDO, Tsuyoshi KAJIMOTO, Kiyoshi SHIZUMA

3  Influence of the Fukushima Daiichi Nuclear Power Plant accident as determined by results of environmental radiation monitoring in Kyoto
   Naoto FUJINAMI, Naoto MIYAJIMA, Tetsuya WATANABE, Yoshihiro TANABE, Hajime NISHIUCHI

4  Comparison of fallout in rain due to the Fukushima and Chernobyl reactor accidents and the Hiroshima atomic bomb
   Ryuta HAZAMA, Akihito MATSUSHIMA

5  Survey of radioactive contamination distribution in the Naka-Dori area, Tohoku, Japan
   Sin-ya HOHARA, Masayo INAGAKI, Hirokuni YAMANISHI, Genichiro WAKABAYASHI, Wataru SUGIYAMA, Tetsuo ITOH

6  Elution of radionuclides from soil and sludge
   Nobuyoshi ISHII, Hiroyuki KOISO, Keiko TAGAMI, Shigero UCHIDA

7  Development of a self-absorption correction method used for HPGe detector by means of a Monte Carlo simulation
   Hidesuke ITADZU, Tetsuo IGUCHI, Toshikazu SUZUKI

8  Distribution of radioactive 137Cs and 134Cs in river water and bottom sand for major rivers at Minami-Soma City in Fukushima
   Tsuyoshi KAJIMOTO, Satoru ENDO, Takeshi NAGANUMA, Kiyoshi SHIZUMA

9  Determination of radiostrontium released from Fukushima Daiichi Nuclear Power Plant through extraction chromatography and liquid scintillation counting
   Akihiro MAEKAWA, Noriyuki MOMOSHIMA, Shinji SUGIHARA, Toshiya TAMARI

10 Radioactivity in vegetation at the Fukushima area: a study on contamination by radionuclides released from TEPCO's Fukushima Daiichi nuclear power plants
    Noriyuki MOMOSHIMA, Ryosuke OZAWA, Sinji SUGIHARA, Ryohei ICHIKAWA, Akihiro MAEKAWA, Akimitsu NAKAMA

11 Concentration of radiocesium in stream water from a mountainous catchment area during rainfall events
    Kimihito NAKAMURA, Tetsuo YASUTAKA, Masato HATAKEYAMA

12 Early air sampling in Higashi-Hiroshima after the Fukushima Daiichi Nuclear Power Plant accident and subsequent sampling in Minami-Soma City from October 2011 to September 2012
    Kiyoshi SHIZUMA, Tsuyoshi KAJIMOTO, Satoru ENDO

13 Estimation of Tellurium-132 Distribution in Fukushima Prefecture
   Keiko TAGAMI, Shigeco UCHIDA, Nobuyoshi ISHII, Jian ZHENG
Part 3 Transfer model and/or parameters

1 Use of rice seedlings to estimate uptake of radiocesium from soil to plants in Fukushima Prefecture
Shigeto FUJIMURA, Yasukazu SUZUKI, Takeshi OHNO, Yasuyuki MURAMATSU, Hirofumi TSUKADA, Kunio YOSHIOKA, Takashi SAITO, Mutsuto SATO, Makoto SATO, Yuuki SAKUMA

2 Deduction of useful information from dose rate monitoring data under emergency conditions
Jun HIROUCHI, Tian ZHENG, Yasuhiro TAKAMURA, Shigezku HIRAO, Jun MORIZUMI, Hiromi YAMAZAWA

3 Possibility of removing radionuclides in landfill leachate using advanced wastewater treatment processes
Nao K.ISHIKAWA, Ayumi ITO, Teruyuki UMITA

4 Estimation of ecological half-lives of radiocesium in marine biota at the offshore of Fukushima, Japan
Kayoko IWATA, Keiko TAGAMI, Shigeo UCHIDA

5 Effect of potassium application on root uptake of radiocesium in rice
Takashi SAITO, Satoru OHKOSHI, Shigeto FUJIMURA, Koji IWABUCHI, Masahiko SAITO, Tomoaki NEMOTO, Mutsuto SATO, Makoto SATO, Kunio YOSHIOKA, Hirofumi TSUKADA

6 Phytoremediation of radiocesium in different soils using cultivated plants
Yasukazu SUZUKI, Takasi SAITO, Hirofumi TSUKADA

7 Direct determination of tellurium in soil and plant samples by sector-field ICP-MS for the study of soil-plant transfer of radioactive tellurium subsequent to the Fukushima Daiichi Nuclear Power Plant accident
Guosheng YANG, Jian ZHENG, Keiko TAGAMI, Shigeo UCHIDA
Part 4  Source term estimation

1  Estimation of uncertainty in the release rate of I-131 and Cs-137 from FDNPS estimated from environmental data
   Shigekazu HIRAO, Hironori HIBINO, Takuya NAGAE, Jun MORIIZUMI, Hiromi YAMAZAWA

2  Release of plutonium isotopes from the Fukushima Daiichi Nuclear Power Plant accident
   Jian ZHENG, Keiko TAGAMI, Shigeo UCHIDA

Part 5  Dose estimation

1  External and internal radiation doses from the Fukushima Daiichi Nuclear Power Plant accident received by residents of Chiba, Japan
   Hikaru AMANO, Yuji OHTA, Shigeru BANBA, Takeshi MAEYAMA, Yoshihiro IKEUCHI, Takao MORIMOTO

2  Internal dosimetry for continuous chronic intake of caesium-137 in cedar pollen after the Fukushima Daiichi nuclear power plant accident
   Sakae KINASE, Masanori KIMURA, Shinji HATO

3  Internal radiation dose of KURRI volunteers working at evacuation shelters after TEPCO's Fukushima Daiichi nuclear power plant accident
   Kouta KURIHARA, Yuko KINASHI, Kenichi OKAMOTO, Eiko KAKIHANA, Tomohiro MIYAKE, Tomoyuki TAKAHASHI, Keiko FUJIWARA, Tatsuya YAMADA, Hiroshi YASHIMA, Hidehito NAKAMURA, Sentaro TAKAHASHI

4  Distribution of doses to residents evacuated after the Fukushima Nuclear Power Station accident
   Shigeru KUMAZAWA

5  Measurement of radioactivity in airborne dust and estimation of public dose in Tokyo after the Fukushima Daiichi Nuclear Power Plant accident
   Yoshiyasu NAGAKAWA, Takashi SUZUKI, Yasuhito KINJO, Noboru SAKURAI, Takahiro SOTODATE, Hiroaki ISE

6  Assessment of radiation doses to the public in areas contaminated by the Fukushima Daiichi Nuclear Power Station accident
   Shogo TAKAHARA, Masashi IIJIMA, Kazumasa SHIMADA, Masanori KIMURA, Toshimitsu HOMMA

7  Initial substantial reduction in air dose rates of Cs origin and personal doses for residents owing to the Fukushima nuclear accident
   Hiroko YOSHIDA, Junko SAITO, Noriyasu HIRASAWA, Ikuo KOBAYASHI
